DETAILED ACTION

Claims 1-18 are currently pending in the instant application.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

Due to the numerous variables in the claims, e.g., R1, R2, R3, X, etc., their widely divergent meanings and the numerous provisos, a precise listing of inventive groups cannot be made. The following groups are exemplary:

Group I, claim(s)1-21 drawn to products of the formula (I) wherein:

X is S,

R1 is optionally substituted thiophene,

R2 is optionally substituted Ar-C0-6alkyl,

R3 is H, optionally substituted C1-6alkyl, C3-6 alkenyl, C3-6 alkynyl, methods of preparation and methods of use.

Group II, claim(s)1-21 drawn to products of the formula (I) wherein:

X is S,

R1 is optionally substituted furan,

R2 is optionally substituted Ar-C0-6alkyl,

R3 is H, optionally substituted C1-6alkyl, C3-6 alkenyl, C3-6 alkynyl, methods of preparation and methods of use.

Group III, claim(s) 1, 6, 11, 16 and 17 drawn to products of the formula (I)

wherein:

X is O,

R1 is optionally substituted thiophene,

R2 is optionally substituted Ar-C0-6alkyl,

R3 is H, optionally substituted C1-6alkyl, C3-6 alkenyl, C3-6 alkynyl and methods of use.

Group IV, claim(s) 1, 6, 11, 16 and 17 drawn to products of the formula (I)

wherein:

X is O,

R1 is optionally substituted furan,

R2 is optionally substituted Ar-C0-6alkyl,

R3 is H, optionally substituted C1-6alkyl, C3-6 alkenyl, C3-6 alkynyl and methods of use.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted. Again, this list is not exhausted as it would be impossible under the time constraints due to the sheer volume of subject matter instantly claimed. Therefore, applicant may choose to elect a single invention by identifying another specific embodiment not listed in the exemplary groups of the invention and examiner will endeavor to group the same. The applicant may also choose to elect a single disclosed species and the examiner will endeavor to create a group comprising the elected species.

The claims herein lack unity of invention under PCT rule 13.1 and 13.2 since the compounds defined in the claims lack a significant structural element qualifying as the special technical feature that defines a contribution over the prior art. The compounds claimed contain an nitrogen substituted triazole, which does not define a contribution over the prior art (as can be seen by US Patent No. 5,760,246, which discloses example 383 in the table on column 213). The substituents on the nitrogen substituted triazole vary extensively and when taken as a whole result in vastly different compounds. Accordingly, unity of invention is considered to be lacking and restriction of the invention in accordance with the rules of unity of invention is considered to be proper. Additionally, the vastness of the claimed subject matter, and the complications in understanding the claimed subject matter imposes a burden on any examination of the claimed subject matter.
